

Youngevity ESSENTIAL OILS

AROMA SHARE CLUB

2017

HOW DOES THE AROMA SHARE CLUB WORK?

The **Youngevity® Aroma Share Club** was established to bring all the benefits of aromatherapy to you in an easy, economical monthly package, allowing you to truly experience all the benefits of aromatherapy. Get together with other guests each month to try out the new recipes, blends, craft ideas and share YOUR favorite uses! Additionally, you will quickly build a collection of essential oils that will help keep you and your family healthy and protected.

BY ENROLLING IN THE AROMA SHARE CLUB, EACH MONTH YOU WILL:

- Build a community of aromatherapy distributors/members
- Receive a collection of Youngevity® Essential Oils (from 2 to 4 bottles each month)
- Receive reference cards for each oil in the collection
- Have access to recipes and other blending techniques

Each month you will receive the following Essential Oils as a part of your Aroma Share Club membership:

WHAT ARE ESSENTIAL OILS?

Despite what the term implies, essential oils are not oils, but lipid acid, hydrocarbon molecules that are the building blocks of living cells. Essential oils are the result of a natural, steam distillation or cold-pressed process in which the essential oil is separated from the roots, stems, bark, seeds, fruit, or flowers of aromatic plants. The key therapeutic building blocks found in essential oils are also the key elements found in the human body - oxygen, hydrogen, and carbon – allowing them to be easily recognized and utilized by the human body.

HOW DO ESSENTIAL OILS WORK?

On plants, essential oils provide them with a variety of support, from defense against insects and other animals, to helping attract pollinators; constantly adapting to the plants internal and external environment. Essential oils are scientifically proven to be anti-infectious, antibacterial, antiviral, antiseptic, antifungal and anti-parasitic.

On human cells, essential oils also offer a variety of benefits similar to those provided to plants; defense, protection, and other therapeutic support. They work by entering the body in a few different ways; by applying directly on the skin, inhaling the aromatic components, or by ingesting the oil.

When applied directly on the skin, the essential oil is quickly absorbed, traveling to where it is needed in the body. Some oils can also be ingested by adding to certain food recipes.*

Essential oils can also be inhaled through the nose or mouth. Airborne molecules quickly interact with the Limbic System, also known as the “emotional brain,” which is directly connected to the part of the brain that controls heart rate, blood pressure, stress levels, hormone balance, memory, and breathing.

**Always consult a healthcare professional or seek expertise of an aromatherapy expert as some oils can be toxic to the liver and kidneys when ingested.*

Food and dietary supplement products sold by Youngevity are intended to contribute to the daily diet and overall health and are not intended for use in the prevention, treatment, mitigation, or cure of any disease or health related condition. Individuals who have or suspect they have an illness or who wish to commence a diet or exercise program should consult an appropriately licensed healthcare practitioner for a medical history evaluation, diagnosis, treatment, and health recommendations.
